

Bran Dale D. Nacario

Software Engineer · Full-Stack & Mobile

Cebu City, Philippines · bdn.devwork@gmail.com
dalenacario.com · github.com/Nacar11 · linkedin.com/in/bran-dale-nacario

SUMMARY

Software engineer with 3 years of full-stack and mobile experience across legacy migrations, NDA internal products, and modern Nest.js / Next.js / Flutter stacks. Comfortable owning vertical slices end-to-end — from ERD design and REST API surface through payment integrations and frontend delivery. Integrates AI-assisted workflows (Claude, Windsurf) into day-to-day development without compromising review discipline.

TECHNICAL SKILLS

Languages & Frameworks	TypeScript, JavaScript, PHP, Python, Dart · Nest.js, Next.js, React, Laravel, Flutter, HTML5, CSS3
Databases	MySQL, PostgreSQL, MongoDB, Firebase
DevOps & Infrastructure	Docker, Vercel, Linux server administration
Tools & Practices	Git (GitHub, Bitbucket), Vite, Webpack, XAMPP, REST APIs, ERD design, AI-assisted development (Claude, Windsurf)

PROFESSIONAL EXPERIENCE

Cody Web Development

June 2024 – Present

Software Engineer · Cebu, Philippines

Adtokart — adtokart.com

Nov 2025 – Jun 2026

- STACK Nest.js (primary), Flutter, Next.js, PostgreSQL
- Owned the Products Management System end-to-end on the Nest.js backend — ERD, REST API, and module implementation — with adjacent features on the Flutter and Next.js clients over a shared API contract.
 - Built the Maya payment integration end-to-end: webhook handlers and payment-status transitions validated across success, failure, and retry flows.
 - Integrated AI-assisted workflows (Claude, Windsurf) to accelerate spec → implementation cycles while preserving review discipline.

Internal Product (NDA)

Jul 2024 – Nov 2025

STACK Nest.js, React, REST, event-driven email

- Built backend features pairing REST endpoints with event-driven transactional emails — admin state changes auto-dispatch the right notification — validated end-to-end across the API and React frontend.
- Extended an existing client-facing upstream system so clients could rely on it directly in production, closing capability gaps that had limited its use cases.

Yamaha Japan Migration — jp.yamaha.com

Jun 2024 – Jun 2025

STACK Laravel, PHP, Ethna (legacy), MySQL, Linux

- Contributed to a 15+ engineer team migrating from a legacy Laravel + PHP + Ethna stack to a current Laravel / PHP version while preserving existing functionality.
- Cleaned up accumulated legacy code and acted as a key QA contributor, validating that the migrated system matched legacy behavior end-to-end.

Wonita International Inc.

July 2023 – May 2024

Software Engineer · Startup, Cebu, Philippines

- STACK Flutter, Laravel, MySQL, Google Auth
- Conceptualized a new e-commerce mobile product and owned the build across product modeling, backend, mobile client, and authentication over ~10 months of early-stage development.
 - Designed the relational data model (ERD) the application was built on, anchoring the team's backend + mobile architecture.
 - Implemented Google sign-in for the Flutter mobile client, including Laravel-side token validation and account linking.

PERSONAL PROJECTS

MarketPlace — Flutter + Laravel e-commerce app

STACK Flutter, Dart, Laravel, MySQL, GetX, PayMongo

Buyer/seller mobile app: categorized listings, cart, PayMongo payments, seller inventory and order tracking. Authenticated with Google sign-in. APK published via GitHub Releases.

Adam's Staycation — Next.js marketing site

STACK Next.js 14, TypeScript, Tailwind, Framer Motion

Landing site for a seaside studio rental in Lapu-Lapu City — amenities, gallery, and host details.

Social — MERN-stack image feed

STACK React, TypeScript, Vite, Tailwind, Node.js, Express, MongoDB (GridFS)

Nightlife-themed social feed with image posts: sign-up, captioned uploads stored via GridFS, and a paginated feed.

EDUCATION

University of San Jose–Recoletos

2023

BS Computer Science · Cebu City, Philippines

ACHIEVEMENTS

Excellence Award — 18th Digital Signal Processing Creative Design Contest

March 2023

Awarded in the International Group at the annual contest hosted by Southern Taiwan University of Science and Technology (STUST), recognizing creative engineering work in digital signal processing from entries across the Asia-Pacific region. Four-person team representing the University of San Jose–Recoletos.
